

2430.1 STUDENT ACTIVITIES LITERATURE DISTRIBUTION

During school hours, the distribution of literature relating to activities available to pupils shall be limited to literature provided in conjunction with regular curricular course content, or relating to those activities that have been designated by the school district as extracurricular activities.

In addition, in the elementary grades (K-5) only, those community based non-profit organizations sponsoring activities that supplement and augment the educational program or that provide recreational programs for elementary age children may be granted permission to distribute flyers or other printed materials announcing pertinent information about the activities, or information explaining or promoting the activities to elementary pupils.

The grant of such permission shall be subject to the approval of the Superintendent of Schools or designee, upon a finding that the distribution meets the standards of this policy and district policies relating to commercial advertising (Policy 7510 - Use of School Facilities, Policy 6162 - Corporate Sponsorships and Policy 9700 – Special Interest Groups), and that the proposed method of distribution does not divert significant resources from the regular educational program.
